
HAB vs. MLC-ACCOM

- HAB

- Intended to improve crew task performance, safety, habitability and the higher HAB+ and HAB++ levels to increase the quality of life.
- Accommodation Area Criteria
 - Applicable to accommodation areas and spaces directly connected to accommodation spaces
- Ambient Environmental Criteria
 - Applicable to accommodation areas and enclosed work spaces where crew members are present 20 min or more as well as deck areas for lighting

- MLC-ACCOM

- Intended for safety and health conservation and to provide a habitable environment.
- Accommodation design and ambient environment criteria applicable to accommodation block (cabins, mess, recreational areas, sanitary spaces, and laundry) only.
