

GLOBAL GOVERNMENT SERVICES

The ABS Global Government Services team supports government clients by delivering customized naval Class and associated solutions.

WHO WE ARE

For more than 100 years, ABS has been working with the U.S. Navy, U.S. Coast Guard and other government ship-owners to support uninterrupted global force projection, coastal defense, law enforcement, research, survey and logistics operations.

As the world's most experienced and largest class organization, ABS provides a suite of services to government clients; as of August 2017, we have classed more than 200 government vessels.

WHERE WE WORK

ABS has a dedicated Naval Engineering office in Houston, Texas, supported by professionals with vast experience working with government ships. Four divisional offices also support our worldwide network of classification and related services.

- Americas
- Europe (including Africa and the Middle East)
- Greater China
- Pacific

SERVICES AT A GLANCE

Our comprehensive portfolio of services supports every phase of a government vessel's life cycle – from concept refinement and detailed design to construction and through the entire service life. Our services include:

- Design review to ABS Rules and survey during construction
- ABS Service Life Evaluation Program (SLEP)
- Naval Ship Code compliance (ANEP-77)
- Approval in Principle (AIP) and preliminary review for statement of compliance
- ABS CyberSafety® Program assessment
- Polar Code and ice capabilities
- Computational Fluid Dynamics (CFD) and advanced engineering services

CONCEPT DESIGN AND ACQUISITION SUPPORT

Approval in Principle provides concept risk assessment, identifying relevant failure modes and demonstrating project feasibility.

DETAILED DESIGN AND CONSTRUCTION SUPPORT

ABS Rules and Guides for international naval ships and high speed naval craft have been developed specifically for government ships, based on their unique design, structure and mission.

The Naval Ship Code (ANEP-77) provides a goal-based alternative to the prescriptive requirements of SOLAS to promote safety of naval vessels.

LIFE CYCLE AND IN-SERVICE SUPPORT

ABS SLEP is a fully customizable program that provides a life cycle management suite of engineering and inspection services for naval and government vessels.
