

# ELECTRONIC SURVEY PLANNING

The ABS Nautical Systems® (NS) Electronic Survey Planning Document (eSPD) facilitates smarter survey planning through better information sharing, and assists in survey execution to minimize nonproductive time.

## SMARTER SURVEYING

Integrated within the NS Hull Manager, an eSPD provides survey data insights affording opportunities for less intrusive surveys and risk-based inspections. Survey data aggregated from NS Hull Manager and in compliance with the Hull Inspection and Maintenance Program (HIMP) allow owners to foresee survey challenges before they occur by providing data insights so that survey planning and recording of critical areas, findings, maintenance, and repairs are linked and available for reporting.

## BENEFITS OF ESPD WITH NS HULL MANAGER

**POWERFUL | SIMPLE | RELIABLE**
