
NS CLOUD

The power of the Nautical Systems Fleet Management software is available in the cloud, offering an easy and cost-effective option for implementation, deployment and management of NS.

According to a 2015 Forrester study, traditional on-premise data storage is four times the cost of cloud storage. NS Cloud delivers powerful state-of-the-art infrastructure while easing the cost and effort involved in service delivery and IT staff training – the IT services you need, at a price you can afford.

NAUTICAL SYSTEMS AND MICROSOFT AZURE

NS Cloud is delivered on the leading-edge Microsoft Azure® platform, delivering performance with the quality and compliance standards you expect from ABS.

- Security and privacy are at the heart of Azure and backed by the global resources of Microsoft
- The Azure platform has EU, US and other regional compliance standards built in
- A global network of Microsoft data centers delivers high-performance solutions and deployment options
- Disaster recovery is embedded

- Bundled NS services deliver a full-service software experience

NS CLOUD SERVICES

- **Tier 1** – Hosting plus initial software deployment, one patch upgrade per year.
- **Tier 2** – Optional monitoring of system processes and health.
- **Tier 3** – Optional customized application services, including interface monitoring, data maintenance and creation, help desk functions, etc.

NS Cloud scales with the growth of operations. The NS Project Management organization and Customer Care teams ensure service delivery.

ABOUT ABS NAUTICAL SYSTEMS

At ABS Nautical Systems (NS), marine and offshore is our focus. Our software design, implementation approach, industry expertise and ongoing support capabilities reflect a deep history in the maritime sector.
