ABS TANKER SUPPORT

From the first 100,000 dwt tanker to today’s most advanced tankers, ABS has been providing owners and operators with the insights and guidance needed to achieve their goals, always with an eye towards safety and sustainability.

As the leader in tanker classification along with a network of more than 2,000 engineers, surveyors, and operational support staff located around the world ABS is ready to assist your tanker fleet and deliver efficient, practical and responsive service throughout your vessel’s life cycle.

Industry-Leading Tanker Solutions

ABS Sustainability Centers

- Benchmarking and improvement options (EEXI, CII, Poseidon Principles)
- ESG assistance
- Alternative fuel evaluation

New Construction and Class Services

- Assistance in notation selection
- Technical support
- Compliance guidance

From the industry’s leading energy-efficient tanker designs to environmentally friendly vessel scrapping, ABS has continued to support the tanker market.

ABS offers digital solutions tailored to tankers for achieving sustainability goals, fleet efficiency, and asset and risk management to meet charterer requirements.

With over 300 CAP assessments performed in the last five years, ABS CAP is recognized as an industry-leader by every cargo owner and charterer.

Additionally, ABS also offers several other services and solutions to assist the industry, including ABS Chem Software, Rapid Response Damage Assessment (RRDA), Ship Construction File (SCF) Archive and ABS Academy courses designed for tankers.
