*Note: The Chapter/Section headings and references in the “Paragraph” column relate to the printed 2006 Pipeline Guide. Changes to Chapter 1 references noted in the “Comments” column are due to the publication of the consolidated ABS Rules for Conditions of Classification – Offshore Units and Structures (Part 1), which resulted in the Sections of Chapter 1 of the Pipeline Guide being renumbered (for example, Section 1-3 is now Section 1-2). See Notice No. 2.*
