Pre-requisites

Ensure the required **ABS MyFreedom** setup is completed:

- 1. Confirm that an ABS MyFreedom account has been established.** If an account has not yet been set up, complete the [Registration Form](#) before continuing.
- 2. Confirm that an individual user account has been created.** If an individual user account has not been created, refer to the **Walkthrough of Access Manager** and complete the required steps.

*For Access Manager training, navigate to **Freedom Help Center** → **General** → **Walkthrough of Access Manager**.*

General

In this training section, we'll cover a quick user tour, managing access, and resetting passwords. You'll also learn how to preview documents, customize table views, use the Customize button, export data, and mark favorites. By the end, you'll be equipped to navigate the ABS MyFreedom Portal confidently.

What is CAP?

The **Condition Assessment Program (CAP)** is a voluntary evaluation used to confirm the physical condition and maintenance of a vessel above the requirements for class. It provides a CAP rating that many major charterers require. It is based on detailed surveys, thickness measurements and extensive testing of the vessel's machinery, equipment and cargo systems.

Users can view or download their CAP deliverables in the **ABS MyFreedom Client Portal** for projects completed after January 25, 2026. Any prior records may be accessible upon request. This guide provides instructions for accessing and navigating the CAP page.

Accessing CAP

1

Open the **Quick Links** dropdown in the top navigation and click **Condition Assessment Program**.

2 The **CAP Project List** opens and displays all CAP Projects available to your company by vessel.

Note: What You Should Do (For Users)

- Contact your company’s **ABS MyFreedom™ Client Portal account manager**.
- Request that the CAP permission be enabled for your user account.
- If you are unsure who your account manager is, use the contact information shown on the *Permission Denied* page or reach out to your usual ABS contact.
- Once your permissions are updated, you will be able to access the CAP page from **Quick Links**.

Viewing Access to CAP

- 1

Select **My Account** under your profile.

- 2

Locate the **Permissions** panel on the right-hand side.
- 3

Review the list of available permissions. Contact your account manager to grant CAP permission if it is disabled.

Note 1: How to Interpret Permissions

- **ON (Enabled):** You should be able to access CAP from Quick Links.
- **OFF (Disabled) or Not Visible:** You do not have CAP access.

Regular users can only view permissions. Only an account manager or admin can enable or disable access.

Account Managers: Granting CAP Permissions to a User

- 1

Select **Access Manager** under your profile.
- 2

Search for the user by name, email or username.
- 3

Select the user to open their profile.

4 Enable the **Condition Assessment Program** permission.

5 Click **Submit**.

The screenshot displays the ABS MyFreedom user interface. The top navigation bar includes the ABS logo and links for Rules and Resources, Services, Innovation and Technology, News and Events, and About Us and Careers. The user profile 'emaratmlc' is shown in the top right corner. The main content area is divided into several sections: 'ABS MyFreedom™' with a search bar and filters, 'Account Manager' with user details, and 'View emaratmlc' with user information and contact details. The 'Permissions' section on the right lists various permissions with toggle switches: Access Manager, Design, Vessel, and Condition Assessment Program. The 'Condition Assessment Program' toggle is highlighted with a red box and a red callout labeled '4'. The 'Submit' button is highlighted with a red box and a red callout labeled '5'.

Summary

CAP Users

- Access CAP via **Quick Links** → **Condition Assessment Program**.
- If you see **Permission Denied**, contact your account manager.

Account Managers/Admins

- Open **Access Manager**.
- Enable **Condition Assessment Program** in the user's **Permissions** panel.
- Save changes so the user can access CAP.

Managing CAP access through Access Manager ensures that only authorized users can view and work with CAP projects and deliverables.
